

# Measure Internet Censorship

## Install OONI Probe

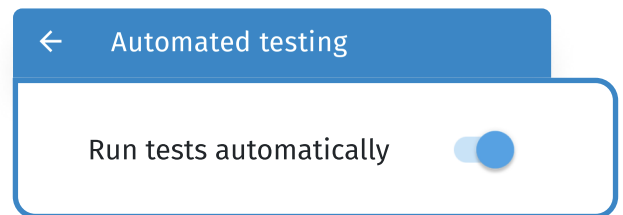

OOONI Probe is a free software app that **measures Internet censorship**, such as the blocking of websites and instant messaging apps (e.g., WhatsApp).

## How to contribute?

Contribute to the world's largest open dataset on Internet censorship. In real-time, your OONI Probe test results are published as open data.

Enable **Automated testing** and contribute measurements every day!

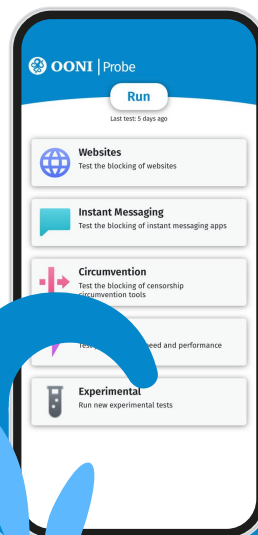

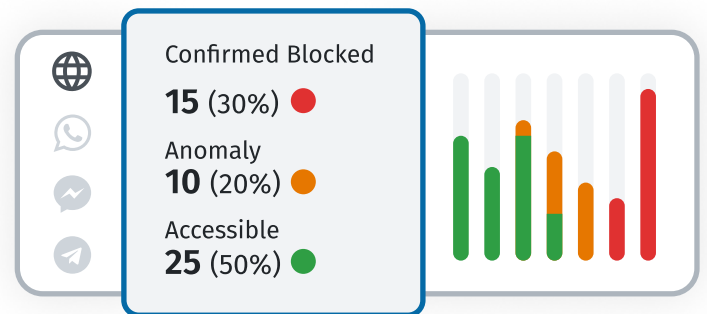

## Heads-up!

Please **turn your VPN off** when running OONI Probe to help ensure more accurate test results.

Running OONI Probe **can potentially be risky** in certain countries.
